Standards for Variances - The Zoning Board of Appeals shall approve findings of fact based upon the evidence presented to it with respect to the following standards:

1. The physical surroundings shape or topographical conditions of the specific property will cause a particular hardship to the owner as distinguished from a mere inconvenience, if the strict letter of the regulations were carried out.
2. The conditions upon which a petition for a variance is based are unique to the property for which the variance is sought and are not applicable generally to other property within the same zoning classification.
3. The purpose of the variance is not based exclusively upon a desire to make more money out of the property.
4. The alleged difficulty or hardship is caused by this ordinance and has not been created by persons presently having an interest in the property.
5. The granting of the variance will not be detrimental to the public welfare or injurious to other property or improvements in the neighborhood in which the property is located.
6. The proposed variance will not impair an adequate supply of light and air to adjacent property, or substantially increase the congestion of the public street, or increase the danger of fire, or endanger the public safety, or substantially diminish or impair property values within the neighborhood.
7. The variance requested is the minimum variance that will make possible the reasonable use of the land or structure. (2-20-01)
