Chicago, Ill 60666

Dear Mr. Gray,

This letter is to verify our conversation regarding Turbines #22 and #23 that directly affect Thacker Airport. You said that Turbine #22 will be eliminated and that that parcel will not have a turbine built on it. Also, that Turbine #23 will be moved east to the minimal setback limits from County Road 2650E or approximately 2700' east of the runway at Thacker Airport. I also understood that given the application was made for 117 turbines with the expectation that approximately 100 would be built that should after settling with other turbine objections and there still remain more than 100 turbines then turbine #23 would also be eliminated. Of course, elimination of turbine #23 is in the best interest of Thacker Airport.

Please respond to my summary of our conversations with a copy to the people listed below. Thank you for your cooperation.

Regards,

Bill Thacker, owner
Thacker Airport
